DETAILED ACTION

Election/Restrictions

In response to the substantial Amendments to the claims in the response filed June 24, 2009, the Restriction Requirement is hereby WITHDRAWN and claims 46-70 are pending.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Regarding claims 46-57, the prior art does not show or teach the first and second induction elements on one ferromagnetic element, with the outputs substantially but precisely simultaneously in time without further movement of the magnet, the time shift determining the direction of the re-magnetization of the ferromagnetic element, all in the manner as recited in the claims an in combination with the other features of the claims.

Regarding claims 58-70, the prior art does not show or teach the sensor element coordinated with the ferromagnetic element having the induction element thereon, the outputs from the sensor element and the induction element being substantially but not precisely simultaneously in time without further movement of the magnet and the direction of re-magnetization of the ferromagnetic element is established by whether or not the sensor element is excited, all in the manner as recited in the claims and in combination with the other features of the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
